# Blockchain and AI in Our Life

*Socio-Political Significance of Recent Technological Developments*

By Dr Emre Eren Korkmaz

This seminar will summarise the basic questions around the recent technological leap and their (potential) impact on the social, political and economic lives.

First, the blockchain-based projects on digital identity and humanitarian aid will be examined.

Secondly, the potential role of AI and blockchain on the sustainability policies of transnational corporations with regard to the global supply chain management, particularly focusing on the relationship among corporations, suppliers, workers and customers will be elaborated.

And the social-political and legal debates on the future of work will be summarized.

ALL WELCOME!

**Dr Emre Eren Korkmaz** is Newton International Fellow & St Edmund Hall Junior Research Fellow at the University of Oxford, working at present as Post-doctoral researcher at the Department of International Development.

## SEMINAR SERIES

No 17

Friday, 23 March 2018

6:30pm - 8:30pm
